GTS LUDO – FUNDRAISER TOURNAMENT 2020

Greenville Tamil Sangam (GTS) welcome you all to the online gaming tournament of the most popular Lockdown game LUDO.

ONLINE APP

- Tournament will be held in the online app – YALLA LUDO

Google Play: https://play.google.com/store/apps/details?id=com.yalla.yallagames&hl=en_US

Apple Store: <https://apps.apple.com/us/app/yalla-ludo-ludo-domino/id1419536376>

- Detailed schedule regarding groups and matches will be sent once registration period ends.

GENERAL RULES

- All games shall be played with Master Magic mode. This is to have some extra fun than the regular classic mode.
- Yalla Ludo is selected mainly because of its real time voice chat feature. Feel free to mute yourself and other players if not interested to use voice chat during game.
- Play fair, partnering with another player is not encouraged.
- Don't influence other players during game i.e. Avoid suggestions on what another player should do during their turn.

HOW TO START A GAME?

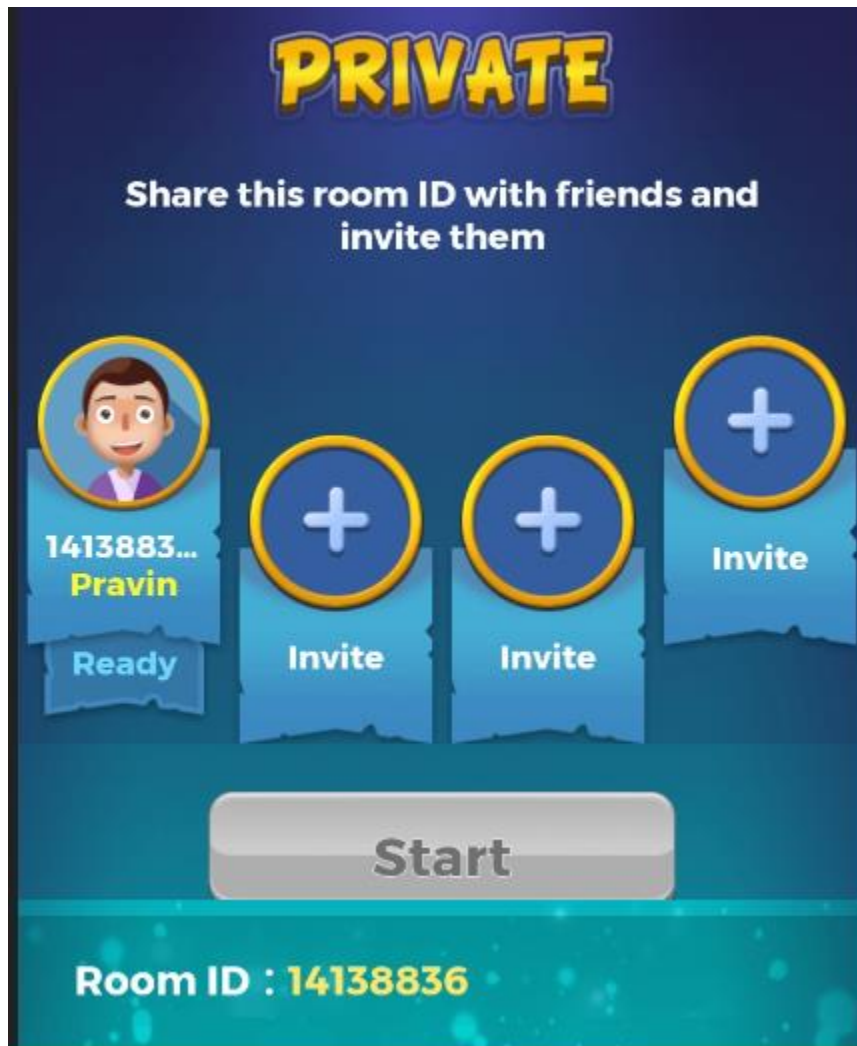

- Once schedule is sent out and time is fixed for a game, one person (Host) creates room and rest three will join the room to get the game started. Here are the steps to be followed.
- Select Private & Local

- Choose Master and check Magic. Then click Create

- Share the room code to other players:

- Once all 4 players are in, click on start and enjoy the game.

HOW TO JOIN A GAME:

- Click on Private & Local.
- At the bottom of the page, there will be option to join friends' room.

- Click Join and enter the room code shared earlier by host.

GENERAL RULES:

Note: You must cut/kill atleast one token before entering Home, else the token will go on second round 😊

SAFE SQUARES

Tokens on the start squares and star squares are protected and cannot be killed.

TWO TOKENS ON THE SAME SQUARE

Two tokens of the same color may overlap on the same square and form a roadblock, obstructing the passage of other tokens.

Note: This is good way to escape from getting your tokens killed from regular tokens. But be aware another player can also form a double token and kill your double token. This will send back both of your tokens back to nest. Also, only if you get even numbers when rolling dice, you will be able to move this double token. So, use wisely 😊

REWARD OF KILLING

Tokens of different colors can kill each other. You will get an **EXTRA TURN** to roll the dice if you kill an opponent's token.

MOVING TO THE ENDING TRACK

On the ending track, you can proceed only when the point is equal or is less than the distance from the end.

Note: Magic mode offers these two additional features, which adds more fun to the game.

Note: Game offers to reverse the roll, anytime you want. But the same is not allowed in our game to be fair for all players.

RESULTS:

- At the end of each game, host of the game should share the screenshot of the game result with organizers to keep track of progress and plan for next rounds.
